

EDUCATION

Nanyang Technological University, Singapore
Bachelor of Computing, Second Upper Class Honours
Year 4 - Computer Science
Specialisation in Cybersecurity

Aug 2022 - May 2026

Anderson Junior College, Singapore
GCE A Levels

Jan 2018 - Dec 2019

- GCE A-Level Biology, Chemistry, Mathematics, Economics
- 5 Distinctions

SUMMARY

Cybersecurity undergraduate specialising in offensive security and vulnerability research. Hands-on experience analysing exploitation paths and security control limitations across enterprise and critical infrastructure environments. Currently pursuing OSCP to deepen expertise in system exploitation and post-exploitation techniques.

EXPERIENCE

Singtel
Cybersecurity Analyst Intern

Jun 2025 - Aug 2025

- Performed real-time security monitoring and incident investigations within a SOC environment by correlating logs, alerts, and threat intelligence across SIEM platforms.
- Identified exploitation attempts, misconfigurations, and privilege escalation indicators during incident investigations.
- Analysed web and network traffic to identify indicators of compromise and anomalous system behaviour.
- Analysed detection gaps and contributed to tuning SIEM use case detection rules to better identify exploitation attempts and post-exploitation activity.

YTL Powerseraya
Cybersecurity Intern

Jan 2025 - May 2025

- Performed detailed cybersecurity risk assessments across IT and OT systems supporting critical operations, identifying data and operational risks.
- Contributed mitigation recommendations aligned with infrastructure security controls and business continuity requirements.
- Analysed system architectures and trust boundaries to assess risks related to authentication, access control, network exposure, and system dependencies.
- Investigated security events using Splunk to assess anomalies and evaluate potential operational impact.

COURSEWORK

- Ransomware Threat Intelligence & TTP Analysis (2025): Conducted primary research on four ransomware groups, analysing 665 victims (Jan–Aug 2024) to identify targeting trends and data exfiltration patterns, and mapped attacker behaviours to the MITRE ATT&CK framework.
- TISC (2025): Participated in a CTF focused on exploitation and attack simulation tasks.
- Parking Availability Web Application (2024) : Developed a robust parking availability application catering to both car and bike users, featuring real-time updates and enhanced search results.
- Hack & Roll Hackathon (2024) :Development of a web application designed to recommend book choices to users based on individual preferences.
- Java Project (2023) : Designed a system tailored for school camps, incorporating various functionalities.

CERTIFICATIONS

- GIAC Certified Penetration Tester - SEC560 (2025)
- Github Advanced Security Certificate (2025)
- Google Cybersecurity Certificate (2024)
- Google Advanced Data Analytics Certificate (2024)
- OSCP - In Progress

SKILLS

- SIEM, Metasploit, Burp Suite, Nmap, Nessus, Wireshark
- Programming Language - C, C++, Java, JavaScript, Python, HTML, CSS, SQL
- Cybersecurity: Computer Architecture/TCP/IP/Web App Testing/Cryptography/OWASP Top 10, Pentesting
- Misc: Bash, PowerShell, Windows, Linux

- Microsoft Office - Microsoft Excel, Powerpoint, Word, PowerBI
- Singapore Sign Language Level 2

CO-CURRICULAR ACTIVITIES AND COMMUNITY SERVICES

NTU Welfare Services Club, Deaf Community, Elders

Aug 2022 - Present

Volunteer

- Volunteered in community outreach initiatives to raise awareness about deaf culture, promote understanding, and foster inclusivity
- Organizing and facilitating various workshops and activities for the deaf community
- Organizing and facilitating weekly events for elderlies

Red Cross Youth

Feb 2017 - Dec 2018

Volunteer

- Delivering health and safety training programs, including first aid, CPR, and disaster preparedness, to individuals and communities
- Engaging and mobilizing volunteers to participate in Red Cross activities, blood drives, and community outreach programs
